

SyncFlow

One platform to sync every system.

The data integration platform that ends manual reconciliation — connecting the systems your teams rely on, in real time, with compliance built in.

Prepared by Jordan • Account Executive

Q2 pipeline \$570K • Closed-won \$186K • Quota \$450K

The problem: data trapped in silos

Every active account is losing time and money to disconnected systems

Greenline Logistics \$76K PAIN Manual inventory tracking across warehouses	Apex Financial Group \$110K PAIN Audit trail gaps & audit risk	BrightPath Education \$120K PAIN Fragmented student data (SIS/LMS/finance)	Coastal Health Systems \$90K PAIN Patient data sync issues (EHR/scheduling)	Meridian Retail \$75K PAIN Shopify + inventory sync (overselling)
--	---	--	---	---

5 active deals • \$471K open pipeline — all blocked by the same root cause: systems that don't talk to each other.

The solution: SyncFlow

Three capabilities that turn disconnected systems into one live source of truth

1

Integration Hub

Connect any system — ERP, WMS, SIS, LMS, Shopify, EHR — with pre-built connectors. No more spreadsheets bridging the gaps.

2

Real-Time Sync

Data flows live across systems the moment it changes. Inventory, records, and transactions stay consistent everywhere.

3

Compliance Engine

Immutable audit trails, data lineage, and privacy controls (SOC 2, HIPAA-aligned) baked into every sync.

Features mapped to your deals

Each account's pain maps directly to a SyncFlow capability

Account	Pain Point	SyncFlow Feature
Greenline Logistics	Manual inventory tracking	Integration Hub + Real-Time Sync
Apex Financial Group	Audit trail gaps	Compliance Engine
BrightPath Education	Fragmented student data	Integration Hub (unified record)
Coastal Health Systems	Patient data sync issues	Real-Time Sync + Compliance Engine
Meridian Retail	Shopify + inventory sync	Integration Hub (Shopify connector)

Same platform, five wins — that's why this is a portfolio sell, not five one-offs.

The ROI: value that pays back fast

Typical mid-market customer outcomes with SyncFlow

15 hrs

saved per week on manual reconciliation

\$78K

annual value per customer

~6 wks

payback on the Pro tier (\$8K)

Active pipeline by account — \$471K open

Let's get your systems in sync

Recommended next steps

1

Confirm scope & tier

Align on the right SyncFlow tier (Starter / Pro / Enterprise) for your systems and team size.

2

Review pricing & ROI

Walk the tailored ROI model — hours saved, annual value, and payback for your environment.

3

Pilot & implement

Kick off a scoped implementation with a dedicated solutions engineer; live in weeks, not quarters.
